

Effect of Biozyme Crop+ on Groundnut

Key Results

	Treated	Control
Pod Yield (q/ha)	225.5	188.4
Haulms Yield (q/ha)	701.9	715.7
Kernel Yield (q/ha)	160.8	128.9
Shelling Percent(%)	71.3	68.4
100 Kernel wt. (g)	35.1	33.1

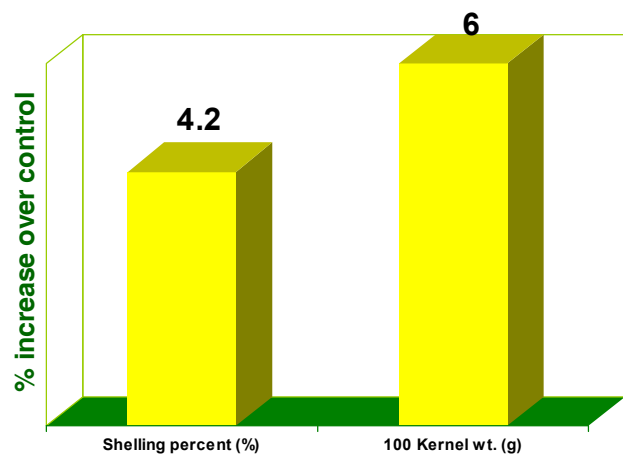

PROTOCOL

Crop	: Groundnut
Institute	: G.A.U, Anand, Gujarat, India
Product	: Biozyme Crop+
Applications	: @ 90 ml / acre at
pegging stage.	

Researchers' Conclusion

Spraying of Biozyme Crop+ @ 90ml / acre at the time of pegging yielded maximum dry pod (2255 kg / ha) and this treatment registered approximately 20% higher yield over control.
